CAREER OBJECTIVE

Motivated and detail-oriented Python Web Developer aspirant with strong fundamentals in programming, database management, web technologies, and software engineering. Looking for an opportunity to contribute to real-world products by building scalable, secure, and user-friendly applications. Interested in Python backend development, automation, API integration, data handling, and web application projects.

TECHNICAL SKILLS

Category	Skills
Languages	Java, Python, C, C++, JavaScript, HTML5, CSS3
Frameworks	Flask, Django Basics, Spring Boot Basics, Angular Basics, Bootstrap
Database	MySQL, SQL, DBMS, ER Modeling, Normalization, Query Optimization Basics
Tools	Git, GitHub, VS Code, Eclipse, Postman, XAMPP, Linux/Ubuntu
Concepts	OOPs, REST API, MVC Architecture, Authentication, SDLC, Cloud Computing Basics, DevOps Basics

PROJECTS

AI-Based Resume Screening System

- Designed a resume screening workflow that identifies skills, experience keywords, and suitable job categories.
- Used Python-based logic for parsing, ranking, and generating match percentage for job recommendations.
- Created frontend pages for upload, result dashboard, and candidate profile summary.

Inventory Management System

- Built modules for stock entry, sales, purchase, supplier records, and low-stock alerts.
- Used MySQL database design, CRUD operations, and reporting features for business workflow.

Weather Forecast Web App

- Integrated API-based weather data with a responsive web interface.
- Displayed city-wise temperature, humidity, wind speed, and forecast details with clean UI.

EDUCATION

Master of Computer Applications (MCA) / Bachelor's Degree — Your College/University

- Relevant Coursework: Data Structures, DBMS, Operating System, Computer Networks, Software Engineering, Web Development

CERTIFICATIONS & TRAINING

- Java / Python Programming Fundamentals
- Full Stack Web Development Basics
- Database Management System and SQL
- Cloud Computing and DevOps Fundamentals

ACHIEVEMENTS

- Built academic-level projects with clean UI, database connectivity, authentication, and modular architecture.
- Practiced problem solving using OOPs, SQL queries, API integration, and deployment-oriented concepts.
- Prepared documentation including ER diagrams, DFDs, project overview, modules, testing, and future scope.

SOFT SKILLS

Problem Solving | Team Collaboration | Communication | Time Management | Quick Learning | Presentation Skills
